EziHold Mounting Frame

Bike Rack Frame for mounting EziHold Square Rack

The EziHold Mounting Frame is a robust steel framework designed to make installing and organising EziHold Square bike racks simple, efficient, and highly adaptable. Rather than fixing racks individually, this system allows EziHold Square racks to be securely mounted to a single frame, creating a neat, consistent, and space-efficient bike storage solution. It is particularly valuable in areas where wall mounting is not possible, while also ensuring compliance with Australian Standard bike spacing requirements.

Code	Description	Material	Upright (mm)	Horizontal (mm)
	Bike Mounting Frame	Galvanised	50mm x 50mm SHS	40mm x 40mm SHS

NOTE: EziHold Square bike racks are not included with the EziHold Mounting Frame and must be purchased separately.

Features

- Heavy-duty steel construction for strength and durability
- Designed specifically for EziHold Square bike racks for fast, secure attachment
- Allows easy, accurate spacing of racks to Australian Standard
- Ideal for freestanding installations where walls are unavailable or unsuitable
- Highly space-efficient, creating a clean, organised bike storage area

Application

Suitable for residential, commercial, and end-of-trip bike storage areas requiring a flexible, compliant, and freestanding mounting solution.
