SH60 Plate

Stainless Steel TGSi Anti-slip Warning Tactile Plate Format

The SH60 Plate combines wide aesthetic appeal with high slip resistance properties. T316 grade stainless steel tactile ground surface indicators with grit non-slip inserts. The plates are supplied with pan head stainless steel screws and nylon plugs.

NOTE: When conducting LRV testing on the SH60 Plate, the entire product forms the TGSi zone. Similar to a multi-coloured substrate, where 10 readings are averaged, the final LRV result is the average of readings from both the button top and the plate. Therefore on-site testing of the LRV contrast to the installed surrounding surface is still required (minimum 30% contrast).

Features

- 600mm x 300mm tactile plate
- Anti-slip grit top
- Retro-fit application plate

Application

Interior and exterior
