# Stainless Steel Bollards

Cast In

Classic stainless steel bollards have a welded cap. This helps present the high quality appearance required for architectural environments. These bollards are suitable for below ground installation into a suitable concrete footing.

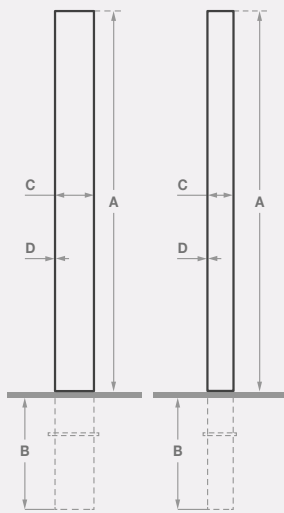

## Application

Cast in

## Finish

Stainless steel  
T316 grade

Code	A length (mm)	B below surface length (mm)	C width (mm)	D wall thick (mm)	Stainless Steel grade	CAP	Baseplate (mm)
