SLIP REPORT INFORMATION

Classic Integra

Coir

Natural Coir Matting

For your information regarding Slip Resistance Requirement for hotels, offices, public buildings, schools, supermarkets and shopping centres, the requirement for slip resistance can be found in both Australian Standard AS4586 (Tables 1 & 2), and HB 198:2014 'Guide to the specification and testing of slip resistance of pedestrian surfaces' Table 3B as follows:

...External ramps, including sloping driveways, footpaths etc under 1:14, external walkways and pedestrian crossings, external carpark areas –

The suggested minimum Wet Pendulum result is **Class P4**

...Entries and access areas; Common areas of public buildings; wet areas; shop entry areas with external entrances -

The suggested minimum Wet Pendulum result is **Class P3**

For further information, please also find a link to our 'White Paper' containing some explanatory information pertaining to Slip Resistance, and covering off the details for the requirements of the [NCC 2019 Building Code of Australia and AS 4586.2013 – Slip Resistance classification of new pedestrian surface materials.](#)

For the **Classic Integra Coir** product, an updated Slip Test report is **NOT AVAILABLE** (being an entry level product).

A test report may be arranged should you require, please ask us for a quote, alternatively we do have premium products that we can offer with full test reports – please discuss with our team.

Please also feel free to download a copy of any of our [Product Data Sheets](#) from the website.

Please note Classic Architectural Group are not licensed Building Surveyors or DDA Consultants, nor do we in any way purport to be. We strongly recommend that you have this product and NCC requirements verified by an accredited party that it is fit for its intended application before installation, including its longevity.
