

Classic

Disabled Car Park Bollard

Surface Mount

The Classic Disabled Car Park Bollard is installed in shared zones between disabled parking spaces to ensure adequate access. This bollard complies with all Australian Standard (AS 2890.6) requirements, including a minimum installed height of 1300mm, and features a minimum 300mm reflective coloured band (that is located at a minimum of 900mm in height above the car park floor, and provides minimum 30% luminance contrast to the pavement). It is very easy to install, simply bolt down onto an existing surface.

Features

- Fully compliant disabled car park bollard
- 1300mm high with 300mm reflective tape
- 165mm diameter
- Powder coated in safety yellow
- Surface mount application

Application

Surface mount
