Classic

Breakaway Bollard

Galvanised or Powder Coated

Crafted from high quality materials, this bollard is meticulously engineered to withstand the force of vehicles such as cars, trucks, and forklifts, making it an ideal option for areas with significant traffic. Its innovative two-part breakaway structure guarantees resilience against heavy impacts while safeguarding the surrounding environment from harm. Classic's Breakaway Bollards are constructed from heavy duty, recyclable steel pipe, ideal for installation in concrete or asphalt.

Features

- Heavy duty construction, made from durable steel pipe
- Breakaway design to ensure if hit, it will break away from the top so no damage is done to the concrete or base
- Easy to install, with the base going in at the structural stage of your project
- Cost-effective choice for protecting warehouses and other properties

This is a made to order product, production time is 12 weeks.
