Installation Guide

DoubleDeck Bike Rack

Tools Required

- Hammer
- Masonry Drill
- 16mm Masonry bit and 12mm Masonry bit
- Socket Set x 2 (including 24mm, 19mm, 17mm & 14mm socket)
- Threadlocker Fluid
- Air Compressor

Important Notes

- Installing a 2 Tier Dynamic Bike Rack is a 2 person job
- Each rack will take approximately 35mins to install
- Racks can only be installed on level ground
- Familiarise yourself with the whole assembly document before proceeding.
- We also suggest that you assemble a set as a 'dry run' to familiarise yourself with the assembly, and to check and confirm the final set-out and placement of the racks before fixing them to the ground
